Difference between TO and For

IA and the way we work

After this class you will be able to:

**Use TO and FOR
in a correct way
in different
contexts.**

AI IN EVERYDAY LIFE

DIRECTIONS: Check the vocabulary, then read the passage and answer the questions.

Today, we use AI in many small ways. When we **look up** information on Google, AI helps find the best answers.

When we use a voice assistant like Alexa, AI understands our voice. On Netflix AI gives us suggestions based on what we like. Some people use AI to write messages or check grammar. AI can also **take over** simple tasks, like replying to emails or setting reminders. It can even **point out** mistakes in writing or help us improve our ideas.

How do you think artificial intelligence will change the way we work in the future?

TO and FOR are prepositions used to indicate different relationships between objects, actions or people.

EXAMPLES: TO

- **Direction or Movement – ¿A dónde?**
I'm going **to the office**.

- **Recipient – ¿A quién?**
I gave the presentation **to my manager**.

- **Purpose – ¿Para qué?**
I often **look up technical terms to understand the reports better**.

EXAMPLES: FOR

- **Duration or Period of Time - ¿Por cuánto tiempo?**
The system runs ***for 24 hours*** a day.

- **Beneficiary - ¿Para quién?**
This system will ***take over*** simple tasks for employees who are overloaded

- **Purpose / Use - ¿Para qué?**
This manual is ***for restoring*** the system.

When we use TO and FOR for purpose:
To is followed by **infinitive**
For is followed by **gerund**

Exercise

DIRECTIONS: Complete with *To* or *For*, be careful with the infinitives and the gerunds

The chatbot sends updates ___ the project manager every hour. (Recipient)

This software was developed ___ **improving** the company's productivity. (Purpose)

This new tool was created ___ the finance team to predict trends. (Beneficiary)

AI tools can **point out** patterns ___ **help** us make better decisions. (Purpose)

AI IN THE WORK PLACE

DIRECTIONS: Read the following text and complete with TO and FOR. Then answer the questions. Provide a complete answer and include a phrasal in it.

Companies use AI __ **improve** efficiency by automating repetitive tasks, allowing employees to focus on more important work. AI also helps to analyze data quickly. It sends data __ **the relevant departments** for *further use*.

Overall, AI is a powerful tool __ **improving** productivity in various industries. The AI systems can run __ **several hours a day** to ensure continuous monitoring. AI also has the ability to *point out* errors and inconsistencies __ employees, so they can correct issues before they become significant problems.

Do you think AI can **take over** repetitive tasks for employees and make work easier?

How do you use AI to **look up** information in the workplace?

Do you think AI will replace us completely in the future?

HOW HAS TECHNOLOGY CHANGED THE WAY YOU WORK?

DIRECTIONS: Explain in a simple way how IA has helped you improve your work or your daily life. Use "to" and "for" in your answer. FOLLOW THE EXAMPLE.

I use AI to **take over my** tasks and **to improve** my writing. It sends reminders **to my phone**, and it creates short summaries **for my manager**. AI is also helpful **for pointing out** my grammar mistakes and **for managing** my emails. I have used it **for more than a year!**
